

# QUICK GUIDE

## *Did you know?*

USB 3.0 is most easily recognized by the characteristic blue color of the insert, unlike USB 2.0, when the insert is black.

## *for USB flash memory*

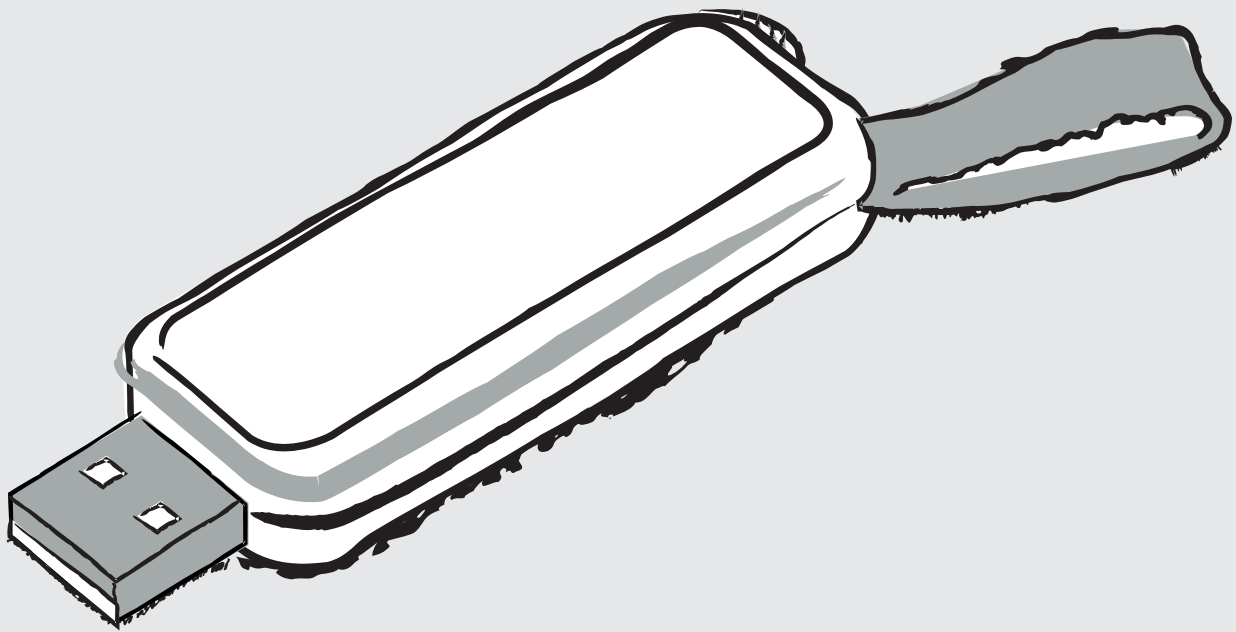

***Flux 37.638.10***

USB FLASH MEMORY, PLASTIC

Dimension: 23 x 57 x 11 mm

Recommended print dimension: 30 x 8 mm

Print type: laser engraving

## *What is USB 2.0?*

USB 2.0 was released in the year 2000, which is also referred to as Hi-Speed USB. It is the most common version of the USB standard that we use every day. The maximum transfer speed of USB 2.0 device is up to 480 Mbps.

## *What is USB 3.0?*

USB 3.0 was released in November 2008 and has gradually become the new standard for USB devices by providing a lot of improvements over USB 2.0. The major one is the data transfer rate. The data transfer rate of USB 3.0 is up to 5 Gbit/s, which is about 10 times faster than the USB 2.0 standard.
